Security Snap Frame
Fixing and Operating Instructions

1. Lay the poster frame face-up and open all 4 sides using the lever tool. (Fig. 1). Remove the cover sheet.

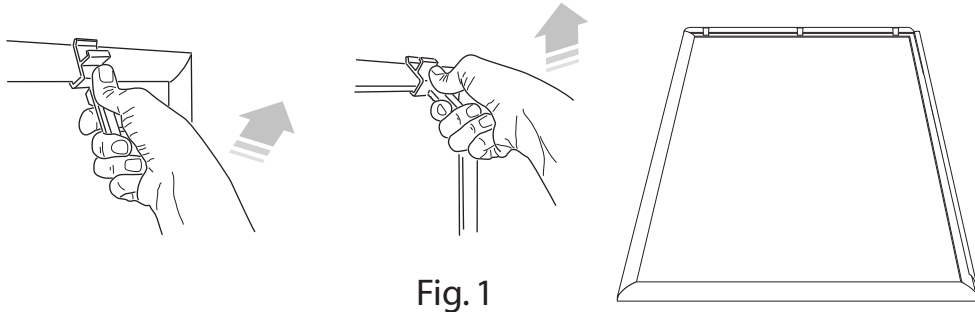

Fig. 1

2. Snap Frames are supplied predrilled for screw fixing to any smooth surface. Screw holes are located on the inside of the frame and can be used for marking the fixing positions.

If fixing to slightly uneven surfaces such as brick, be careful not to overtighten the screws and distort the frame.

3. With the frame securely fixed in position using the fixings supplied, it is now ready to accept a poster. Open all four sides using the lever tool, slide the poster into position, fit the cover sheet and snap the frame shut on all sides to hold the poster. (Fig. 2).
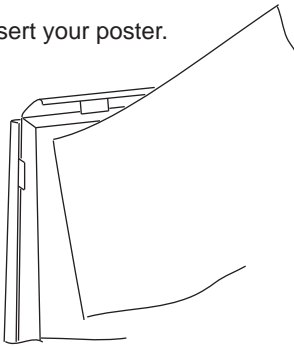

Security Snap Frame

Place the lever tool in the inner edge of the profile & open all sides of the Snap Frame.
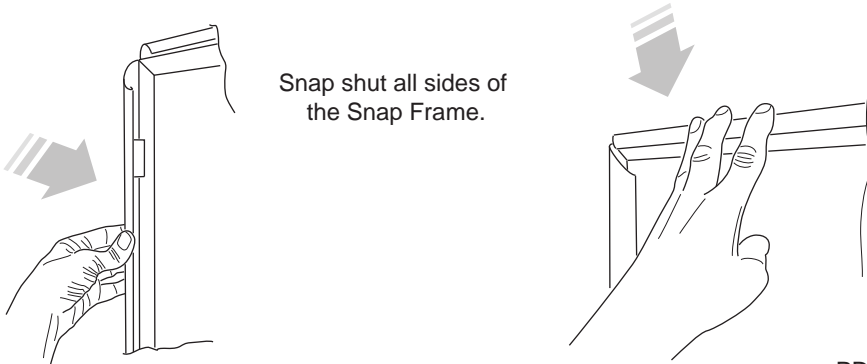

Remove the cover sheet.

Insert your poster.
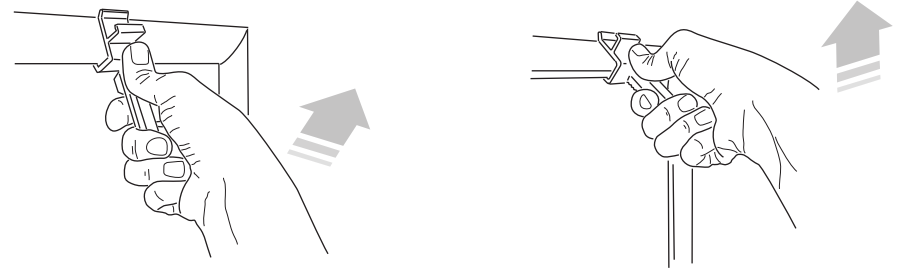

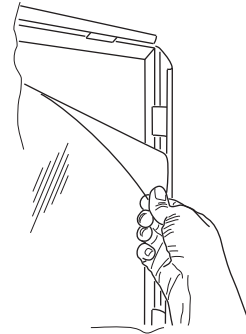

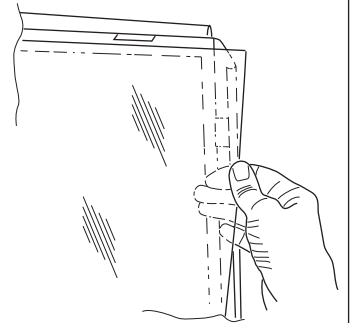

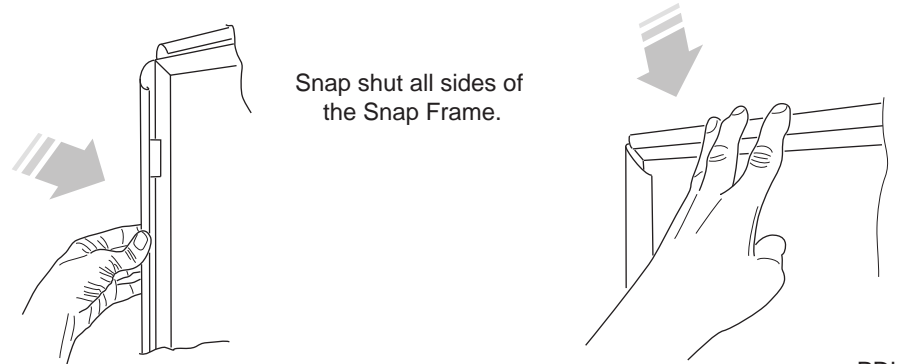

Replace the cover sheet.

Snap shut all sides of the Snap Frame.
